

Automated Resource Management Associates, Inc.

Company Overview

Automated Resource Management Associates, Incorporated (ARMA) is a privately-owned professional and technical services firm serving public and private sector clients. ARMA was established in 1990 in the Washington, DC area as a government support services company, providing management consulting services in engineering, information systems, logistics, and training. Since then ARMA has demonstrated a pattern of consistent, stable growth thanks to our continuous string of satisfied customers.

In January 1994, the United States Small Business Administration (SBA) certified ARMA as a small, disadvantaged minority-owned, women-owned business (SDB, WOSB) qualified to participate in the 8(a) and HUBZone procurement programs. ARMA recently graduated from the 8(a) and HUBZone programs but retains its WOSB and SDB status.

The mission of ARMA is to increase our clients' productivity by providing effective and efficient, technical and administrative support services at reasonable cost, using a structured approach coupled with a performance-oriented philosophy. ARMA helps agencies justify expenditures by delivering measurable positive outcomes: enhanced service capacities, more rapid and robust response times, and reduced costs.

At the core of ARMA's success are our people. Our current staff consists of senior executives and skilled professionals with extensive experience in providing quality products and services to commercial, federal, state, and local agencies.

Over the last fifteen years, ARMA has applied its management and technology expertise to a wide range of projects with both large and mid-scale requirements. We are proud of our record of success, detailed further elsewhere in this proposal. The success of ARMA's people depends upon their ability to rapidly assess and respond to our client's requirements with the appropriate staff and technology resources. ARMA staff constantly strives to maintain a current and complete understanding of the clients' approach and requirements to continue to improve the quality of our products and services.

ARMA remains committed to continuing self-education and adaptation to change. We pride ourselves in our aggressive engagement with new technologies. We combine industry best practices with cutting edge tools and customized processes to solve customer's problems.
